

Amr Hatem Eladawy

Junior Network Security Engineer | SOC Analyst

Mansoura,Egypt | +201013321664 | aeladawy744@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Detail-oriented Computer Science student specializing in Network Security, Defensive Engineering, and Infrastructure Hardening. Backed by 250+ hours of accredited technical training across Huawei, NTI, and DEPI. Experienced in simulating multi-vendor enterprise networks (GNS3, Cisco Packet Tracer, Huawei eNSP), implementing robust firewall policies, and building high-performance Python security automation utilities. Strong communicator skilled in technical documentation, structured incident reporting, and cross-functional team collaboration. Seeking to leverage hands-on lab experience and analytical skills as an entry-level Network Security Engineer.

TECHNICAL SKILLS

- Network Security & Defense: Firewall Policies, IDS/IPS, Access Control Lists (ACLs), IAM, IPsec/SSL VPN, NAT/PAT, Cryptography, Endpoint Hardening.
- Networking & Protocols: TCP/IP Suite, IPv4 Subnetting (VLSM/CIDR), Routing (OSPF, Static), Switching (VLANs, STP, Trunking), DNS, DHCP, Troubleshooting.
- Security & Analysis Tools: FortiSIEM, FortiAnalyzer, Wireshark, Nmap, GNS3, Cisco Packet Tracer, Huawei eNSP.
- Scripting & Automation: Python (Scapy, Sockets, Requests, Nmap API, Multithreading), Bash Scripting.
- Operating Systems & Cloud: Linux (Kali, Ubuntu), Windows Server, AWS Cloud Security Fundamentals, SQL.
- Communication & Professional Skills: Technical Documentation, Incident Reporting, Cross-functional Collaboration, Analytical Problem-Solving, Teamwork.

TECHNICAL PROJECTS & PRACTICAL EXPERIENCE

Enterprise Multi-Vendor Network Architecture & Hardening

NTI / Self-Trained

Tools&Technologies:GNS3,CiscoPacketTracer,HuaweieNSP,OSPF,VLANs, IPsec VPN, ACLs

- Designed and simulated scalable multi-tier enterprise network topologies connecting 3 regional branches with 25+ virtual network nodes.
- Configured multi-area OSPF routing across 6 subnets and 8+ VLANs, achieving sub-second failover recovery with 0% packet loss during link failure tests.
- Hardened network perimeter by implementing 40+ Access Control Lists (ACLs), Stateful Firewall inspection rules, and 256-bit AES site-to-site IPsec VPN tunnels.
- Authored 15+ pages of technical architecture documentation, IP addressing schemes, and security compliance baselines for team presentation.

Custom Network Security Automation & Packet Analyzer

Personal Project

Technologies: Python, Scapy, Sockets, Requests, Nmap API, Multithreading

- Developed a modular, multi-threaded Python scanner capable of auditing 100+ TCP/UDP ports per second, accelerating reconnaissance time by 65%.
- Built automated packet crafting and inspection scripts using Scapy to analyze 10,000+ live network frames and detect header anomalies.
- Automated subnet host discovery and service banner-grabbing routines, generating structured JSON and CSV security audit reports for reporting.

CERTIFICATIONS & SPECIALIZED TRAINING

- HCIA-Security V4** — Huawei (80 Hours, 2026)
- FortiSIEM & FortiAnalyzer Practical Training** — National Telecommunication Institute (NTI) (72 Hours, 2026)
- AWS Security Training** — Digital Egypt Pioneers Initiative (DEPI) (190+ Hours, In Progress)
- Cybersecurity Fundamentals** — MaharaTech (35 Hours, 2026)
- CCNA Routing & Switching Preparation** — Self-Study / Lab Simulation (Completed Comprehensive Hands-On Labs)

EDUCATION

Bachelor of Computer Science — Damietta University, Egypt

Expected Graduation: 2027

- Transferred from Fayoum University (2023 – 2024)

LANGUAGES

- **Arabic:** Native
- **English:** Upper-Intermediate / Professional Working Proficiency (B2 - Fluent in Technical Communication)
